Table 12A	Average Hourly Wage Rates of Employees by Industry, Canada and Nova Scotia
Table 12B	Average Weekly Wage Rates of Employees by Industry, Canada and Nova Scotia
Table 13A	Average Hourly Wages of Employees by Occupation, Canada and Nova Scotia
Table 13B	Average Weekly Wages of Employees by Occupation, Canada and Nova Scotia
Table 14	Employees by Industry and Union Coverage, Canada and Nova Scotia

SOURCE

The source of the enclosed tables has been the *Statistics Canada, 1999 Labour Force Historical Review on CD-ROM (71F0004XCB)*. This annual product is a comprehensive database of Labour Force Survey estimates, containing thousands of cross-classified data series and spanning from 1976-1999. Monthly and annual average series are available on a wide range of subjects. In addition to the tables included in the following pages, **the CD product can also be referenced on a much wider range of subjects, including:**

- Activity Prior to Unemployment
- Census metropolitan Area - industry and occupation
- Class of Worker - employment by industry
- Economic Regions - industry and occupation
- Establishment Size
- Family - status/type
- Hours Lost from Work
- Job Tenure
- Marital Status
- Multiple Job Holders
- Non-CMA Cities
- Overtime
- Reasons for Leaving Last Job
- Reasons for not Looking
- Reasons for Part-Time
- Students
- Supplementary Rates of Unemployment
- Temporary/Permanent
- Type of Work Sought/Search Method

Statistics Canada's Labour Force Survey Data Changes

Release of January 2000 data:

All estimates produced by the Labour Force survey have been adjusted to reflect population counts based on the 1996 Census.

Composite estimation, a new method of estimation that will reduce the volatility of month-to-month changes for a number of variables, has been adopted.

As a result of these two changes, all Labour Force Survey estimates have been revised back to January 1976. The revised historical data were available on CANSIM January 26, 2000 and were released in the labour force annual CD product February 18, 2000.

These changes result in somewhat lower labour force survey numbers; however, the overall growth in employment in the province still mirrors the trends of the previously published labour force survey data.

Note (effective the release of January 1999 data):

Industry data uses the North American Industrial Classification System (NAICS) to provide a common standard framework for the collection of economic and financial data for Canada, the United States and Mexico.

Occupation data uses the 1991 Standard Occupation Classification (SOC91)

Class of worker data classifies employees in hospitals and universities in the public sector, even in cases where those establishments are privately owned.

NOVA SCOTIA LABOUR FORCE AND EMPLOYMENT IN 1999

Employment in the Province averaged 408,600 in 1999, a gain of 9,700 from 1998 (+2.4%) and 40,700 above the 1993 figure. Between 1991 and 1999, there has been a 6.2% increase in full-time jobs and a 11.9% gain in part-time positions. During this period, the most significant change was the rise in full and part-time female employment (11.9% and 12.1% respectively). Employment in Canada stood at 14,531,200 in 1999, up 2.8% over the previous year. The other Atlantic Provinces displayed increased employment during 1999 as well--by 10,700 in Newfoundland, by 10,600 in New Brunswick and 900 in Prince Edward Island.

In 1999, Nova Scotia's unemployed decreased by 3,600 from the previous year, resulting in an annual unemployment rate of 9.6% (10.5% in 1998). Canada's unemployment rate in 1999 was 7.6%, down 0.7 percentage points from 1998. Between 1998 and 1999, the unemployment rate dropped in Newfoundland to 16.9%, 10.2% in New Brunswick, 9.3% in Quebec, 6.3% in Ontario and 8.3% in British Columbia. During this period, the provinces that experienced an increase were Prince Edward Island at 14.4%, Manitoba at 5.6%, Saskatchewan at 6.1% and Alberta at 5.7%.

Employment in the goods-producing sector of the province, which represented 22.2% of the total employed in 1999, increased 3.1% over the previous year. Since 1998, the most significant employment growth within the goods producing sector was in manufacturing (3,000 or 7.1%). Employment in the service sector grew 2.3% during the same period. The greatest growth industries in this sector between 1998 and 1999 were management of companies and administration and other support service (+16.5%) and transportation & warehousing (+12.3%).

The unemployment rate in Halifax Metro during 1999 was 6.7% (this low rate was last experienced in 1989). The Halifax Metro rate was the lowest of metro areas east of Ottawa-Hull. Since 1998, a growth in the labour force of 1,800 and an increase in employment of 2,600 resulted in an overall decrease of 800 unemployed in Halifax Metro.

A review of the five regions of Nova Scotia indicated that although the highest rate of unemployment was in the Cape Breton Region, the rate declined 0.6 percentage points from 1998 to 17.4%. Although employment was down 1,100 from 1998, the region showed an increase in employment of 5,500 over 1993. Compared to the previous year, during 1999 the unemployment rate in the Northern Region declined 0.8 percentage points to 10.5%, 2.0 percentage points to 8.3% in the Annapolis Valley Region, 1.6 percentage points to 10.4% in the Southern Region and 0.4 percentage points to 6.8% in the Halifax Region.
